

● Kronicles Backup as a Service (Basic)

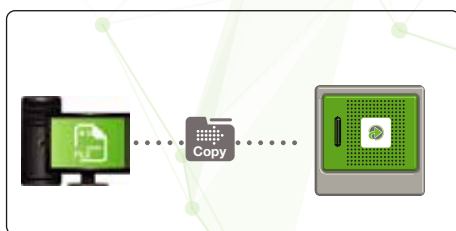

If your organisation has a small number of servers and wishes to protect your data to an off-site location, Kronicles Backup as a Service Basic provides you with an off-site backup, in a secured data-centre in Singapore. An agent will be installed in your server, allowing you to protect the data residing in the server. You will have the ability to restore data individually, monitor backup and receive a monthly backup report.

- Automated backup scheduling
- Tier 3 class Data Centres
- 24 x 7 Monitoring
- Optional Peripheral On-site Device (POD)

● Kronicles Backup as a Service (Enterprise)

Kronicles Backup as a Service (Enterprise), furnishes you with a comprehensive end-to-end backup solution, supplying you with a Peripheral On-site Device (POD), and an off-site backup at a secured data centre. With this the POD will be capable to recover your data in a form of a virtual server, meeting your RTO/RPO.

- Automated backup scheduling
- Tier 3 class Data Centres
- 24 X 7 Monitoring
- Peripheral On-site Device (POD)
